

NORWAY VICINITY

(Continued from page 1)

Christmas Seals

During the latter part of next week, the Norway vicinity will be flooded with messages of good health and cheer from the children of the Norway vicinity. The children of the Norway vicinity are now purchasing Christmas seals to help the fight against tuberculosis.

The need is more urgent than ever before. Tuberculosis is a disease that is spreading rapidly in the Norway vicinity. The children of the Norway vicinity are now purchasing Christmas seals to help the fight against tuberculosis.

Our Western Trip

Story of the Travels of Mrs. Mabel Johnson and Mr. and Mrs. Charles Lombard of Bolster's Mills, in Summer of 1933

Chapter III

The next morning we enjoyed a pretty ride out through Fourth of July canyon, where the ferns and all vegetation grew rank and green. Many syringa bushes grew along the road. Coming out of the canyon, we followed around the sides of the several points of land leading down to Coeur d'Alene Lake to the town by the same name. From the road lead to a Spokane River bridge, we saw wonderful orchards and a grand sight of cherries. Spokane was a nice city, situated at the upper end of the valley and after we had crossed it the ground started rising slowly for some distance. All along this rise of ground it seemed every field was plowed in preparation for planting wheat when next the season came. The wheat was already growing. After reaching Wilbur, the slope was in the other direction until we dropped into Grand Coulee. This is a great hole washed out in the desert by the Columbia River in the days of the ice, but at that time the direction of the river was changed so that it leaves a dry falls of 400 ft. there now, which would be as great as 40 Niagara's, we were told. Below the falls the river is a series of small lakes and the first one being only two or three miles away, we went on and down to the former river bed beside the little fresh water lake to camp for the night. Several people were fishing during the evening and one family apparently lived down there.

Swim in Soap Lake. Learning of Soap Lake, so called, a distance of 32 miles farther down stream, and its curative properties for rheumatism, all skin diseases, stomach trouble and Buerger's Disease, we went down there the next day to take a swim in its waters. The water contains some fourteen elements and is not pleasant to taste and has such a salt content that it leaves streaks of it on you after a swim, but very easy to swim in on account of that. The water was covered with lathers and health seekers all the time and many a skin took a serious burn in no time at all, unless it had been toughened by much repetition as the thermometer registered around a hundred day after day.

The properties contained in the water were thought to have leached out from the several forests which were buried with lava back in the glacial age and along the walls you can notice a series of layers, each one silently telling of such a tragedy. No fish life exists in the lake; only a species of wiggler being discernible. We set up the trailer along beside several other tents under the shade of a line of cottonwoods back a little way from the beach and stayed through the next three days.

Visit Snoqualmie Falls. On the morning of the fourth, we headed westward via Snoqualmie Pass, which had an elevation of only 3,000 ft., but plenty of pretty scenery. After getting through the cascades, the vegetation showed plenty of water to have been there, rank and luxuriant again. Visited the great Snoqualmie Falls of 268 ft. and felt the spray come back up the bank and over the fence, quite a distance. Reaching Lake Washington at about its center on the east side, we had to go up around one end and back to Seattle on the other side. Here we came in the tourist section of Woodland Park and saw the next two days, taking trips out to the city via trolley car. This park had a large zoo connected with it and the most wonderful rose garden that I ever expect to see. The roses were in full bloom and the bushes, just a spatter of blossom and inside the beds were laid out with every conceivable kind and color of monstrous roses blooming each in its own little stake driven down with the name written on it for each kind. In the center of the garden was a rectangular lily pool and at one end a rock garden was built up. Altogether it was a sight never to be forgotten.

One day we took the car into the shopping district and shopped around in the largest market that anywhere abounds, also went out into the harbor and were shown about one of the large battleships that had assembled there the week before for Fleet Week. Another time we went into the residential section of Queen Anne Hill to call on friends.

Washington Visits and Snow. The morning of the twentieth we packed up again to journey on and as we wished to see a little more of the state, we went north some 30 miles to Everett and back through Bothell to Kirkland, down the east side of the lake to Renton and through Pullallup Valley, the richest farming section of the state, to Mt. Rainier Park. We camped at Longview beside the Nisqually River and attended the rangers' lecture on geology and the work of the glacier which proved very instructive.

The next day we left the trailer and went up the side of the Mountain to Paradise, the other camp ground which was still so embedded with snow that few of the cabins were uncovered. The snow had been pushed out of the road by the breaker and we were reminded of our old fashioned winters. From Paradise we climbed up over the snow to the point where the trees ceased to grow in order to get a close-up view of a glacier. There are six live, moving glaciers that form at the top of the mountain and twenty others that form at around 7 to 10,000 ft. and are called dead glaciers. Every knoll that was commencing to get uncovered from snow was covered with flowers, avalanche lilies predominating. On the way back to camp, we took the trail to Comet Falls, a hike up the steep mountain side, a distance of two miles, along a nice trail.

The next morning we left the park, taking the southern route in the road, in the direction of Portland, Oregon. At noon time we had reached the pretty little Lewis & Clark State Park named for the early explorers of this locality. In the afternoon we went on to Longview and started to camp there, but the mosquitoes were so thick and savage and we were going to stay over Sunday in order to go through the Longview mill on Monday, so we decided to go back to the little state park to camp. We afterward learned that they always have plenty of mosquitoes on the Columbia River. Sunday we found ourselves in the midst of a grand picnic, sponsored by Lewis County Grangers.

Going Through Long Bell Mills. Monday we drove down to Longview again and joined the party just after dinner, headed by a guide, where we walked two and one-half miles, going through just one unit of the Long Bell Mills. They saw Douglas fir entirely in this unit and the monstrous logs are guided through the process of sawing and sorting untouched by hands. Men sit at certain locations and work a series of levers which sends the lumber in the desired direction. Some eleven hundred men were employed there. We enjoyed a nicely cooked roast beef dinner at the cafeteria where the men are fed for only 20c. After this trip was over we drove on to Salem, the capital city of Oregon, where we camped on the municipal camp ground for the night.

Hailed by Cop. The next day we kept south on route 99. In the city of Albany a cop haled us about a visitors' registration as the

state of Oregon requests all visiting cars to register at the chamber of commerce. This was a new one on us as this was the first state to ask it. California was the only other one on the trip. We enjoyed the ride down the Willamette valley, it was so productive of nice fruit and grain. Stopped for the night at an auto tourist in the outskirts of Roseburg.

The next day, we crossed a series of passes going over three before crossing Grant's Pass and between there and Klamath we ate dinner beside the road. After dinner we came to where the Oregon Caves were advertised to be some 20 miles off the road, but after talking with people at a filling station, decided not to go in there. Instead, we kept on into the Stikitz forest where we crossed into the state of California and inspectors went through the luggage in the interest of agriculture. The cherries were all we had that they couldn't allow us to pass, so we ate them on the spot and continued through the forest and another pass into Smith's Canyon where we continued down hill for about thirty miles and came out at Crescent City to take a glimpse of the pacific again.

Saw First Redwoods. Saw our first redwoods in the Madrona forest just before we reached Crescent City and I do blame the day for it, being to preserve some of those bulwarks of the forest. Talk about thrills, we had 'em for the rest of the afternoon as the road ran along near the ocean, but they had to eat the road along near the ocean side with no trees for quite a distance so we could look right down the steep side of the mountain into the ocean and think what a place to get pushed off from. After a while trees covered the mountain and shut off the ocean view but after entering the forest, the road was full of sharp turns and twists to avoid the large trees. That night we camped in Humboldt State Park among the giant trees. The next morning we kept on down the coast but the fog hid our view all the morning.

At Clay Beach we called for our California visitors' permit and went out through the deep, fine sand to the surf had pounded it down to a hard surface. We ate our dinner before going to swim in the ocean. The water was covered with lathers and health seekers all the time and many a skin took a serious burn in no time at all, unless it had been toughened by much repetition as the thermometer registered around a hundred day after day.

The properties contained in the water were thought to have leached out from the several forests which were buried with lava back in the glacial age and along the walls you can notice a series of layers, each one silently telling of such a tragedy. No fish life exists in the lake; only a species of wiggler being discernible. We set up the trailer along beside several other tents under the shade of a line of cottonwoods back a little way from the beach and stayed through the next three days.

Visit Snoqualmie Falls. On the morning of the fourth, we headed westward via Snoqualmie Pass, which had an elevation of only 3,000 ft., but plenty of pretty scenery. Hailed by Cop. The next day we kept south on route 99. In the city of Albany a cop haled us about a visitors' registration as the

Ladies' Aid Meeting—Visited by Skunk—Grange Supper and Entertainment—Children's Book Week Enjoyed.

The Ladies' Aid of the Calvary Community Church enjoyed a delightful day when Mrs. William P. Smith, president, entertained at her home on Smith Street. A fine old fashioned boiled dinner was served, and about twenty ladies did full justice to the goodies. The last meeting was held Tuesday afternoon, November 28th, at the home of Miss Josephine Ricker on School Street. Plans were made for the next supper, which will be held December 6th, when an extra fine menu will be served followed by a novelty program. Mrs. Genie Burnham will have charge of the supper and Mrs. B. M. Davis of the entertainment. Arthur Corkum opened his kitchen door on High Street recently and a young skunk walked in instead of the cat which he expected. The skunk set by the sink in the kitchen for several hours, unmolested by anyone. Finally Mr. Corkum arranged a box and enticed Mr. Skunk into it and carried him to the garden safely.

November Meeting of Farm Bureau—Mrs. Murphy Given Surprise Party. Rumford Farm Bureau women held their meeting at the club house and the subject "Hot dishes for cold days" was in charge of Mrs. Maggie Wyman, food project leader, assisted by Mrs. Annie Jacobs. The dinner prepared and served by members to fifteen adults and five children, consisted of mashed potatoes, braised liver, hamburger loaf, cabbage and celery salad, cracked wheat bread, white bread, pumpkin pudding with whipped cream, whole wheat cookies and coffee. In the afternoon work was done as a cereal project leader, assisted by Mrs. Annie Jacobs. The dinner prepared and served by members to fifteen adults and five children, consisted of mashed potatoes, braised liver, hamburger loaf, cabbage and celery salad, cracked wheat bread, white bread, pumpkin pudding with whipped cream, whole wheat cookies and coffee. In the afternoon work was done as a cereal project leader, assisted by Mrs. Annie Jacobs.

WILSON'S MILLS

School Gave Dance—Hunters Left Head of Lake—Men's Club Formed.

A dance was given by the Magalloway school, November 3rd, with music by "The Glowworms" of Erol. A large crowd was in attendance and an oyster stew supper was served at intermission. A. K. Jordan, stage driver, is boarding at E. S. Bennett's. Mrs. Bennett has been assisting Mrs. Lester Littlehale with her house work the past week as she burned her hand very badly.

A whist party was held at the Grange Hall, Saturday evening, Nov. 18. Prizes were won by Mary Bennett and Clifton Littlehale.

Mr. and Mrs. Manuel Sousa and little son, of Portland, have been guests of Mr. and Mrs. Margaret Bennett. Miss Margaret Bennett has been working at Good Luck Camps.

A Men's Club was formed at the Grange Hall Thursday evening, Nov. 16. A supper was served at 6 o'clock. There are to work for the interest of the churches here and in Magalloway.

A Thanksgiving program was given by the Wilson's Mills school at the Grange Hall on the evening of the twenty-ninth. Mrs. A. D. Cameron is spending a few weeks in New York City.

William Adams has returned from Brewer.

WEST RUMFORD. Neighbors and friends of Mr. and Mrs. Bennett had a wood cutting bee Sunday, Nov. 26, and got up their supply of wood. Mr. Bennett came home from the hospital, Friday afternoon.

The Seawave Club met with Mrs. Blanche Bennett, Tuesday, November 21. Philip Keene came home from Canton Monday, November 20.

Mrs. Lucy Bennett is caring for Mrs. Mary Davis, who lives below the village.
